

GATEWAY TO THE FUTURE | SOUTH CAPITOL STREET IMPROVEMENTS

FREDERICK DOUGLASS MEMORIAL BRIDGE LOWERING SUMMER 2007

BEFORE

The elevated northern approach of the Frederick Douglass Bridge is a major barrier to pedestrian/bike, motorist and commercial access along the South Capitol Street Corridor.

AFTER

In July and August 2007, approximately 200 feet of the bridge's northern approach will be lowered by up to 10 feet to improve access and mobility.
